

Andy Clemente Gago

Havana, Cuba - [linkedin.com/in/andy-clemente](https://www.linkedin.com/in/andy-clemente) - github.com/AndyCG03 - +53 55847601 - ing.andyclemente@gmail.com

Software Engineer specialized in mobile applications and artificial intelligence, with experience in FastAPI and RAG architectures for virtual assistants. Competitor in international hackathons and programming contests. I combine technical skills with leadership and communication abilities, demonstrated through teaching and digital community management.

TECHNICAL SKILLS

- **Languages:** Java, C, JavaScript, TypeScript, Python, Dart
- **Mobile Development:** Flutter
- **AI & Backend:** FastAPI, RAG Architectures, NestJS, Whisper, JWT Authentication, LLMs
- **Databases:** PostgreSQL, MySQL, SQLite, ChromaDB
- **Tools & Version Control:** Git, GitHub, VS Code, LaTeX
- **Web & Digital Marketing:** WordPress, SEO, Content Creation

PROFESSIONAL EXPERIENCE

By ONTOP

WordPress Developer

Remote

Apr 2026 - Jun 2026

- Developed and maintained WordPress websites for clients, ensuring responsive design and performance.
- Created content for social media channels to support client marketing efforts.

BioCubaFarma Information Technology Company (ETI)

Programmer Technician

Havana, Cuba

Feb 2025 - Jun 2026

- Leading the development of a unified platform to manage multiple virtual assistants following a Retrieval-Augmented Generation (RAG) approach and using various Artificial Intelligence (AI) models.
- Developed a FastAPI (Python) API that implements a complete management and processing system for virtual assistants, including JWT authentication with roles, user and subscription plan CRUD, document processing (PDF/DOCX) with chunking and embedding generation, storage in ChromaDB for semantic search, an advanced RAG engine integrating LLMs and audio processing (Whisper) to generate contextualized responses, and endpoints designed for cross-platform integration.
- Participated in SIGESTIC 2025 as a delegate, a national-level event organized by ETI within the research/commercial field.

Medialytic

Mobile Programmer

Havana, Cuba

Nov 2024 – Jun 2025

- Completed a 3-month training period with Flutter, acquiring knowledge in Dart, Widgets, state management with Provider, and REST API integrations.
- Developed the "El Chismoso" application using Flutter, which allows users to take photos, enrich them with metadata such as GPS location and description, and upload them to a platform for processing.

Technological University of Havana, José Antonio Echeverría, CUJAE

Teaching Assistant

Havana, Cuba

Mar 2025 - Mar 2026

- Practical class instructor for a student group teaching Introduction to Programming (IP), using the C programming language for first-semester Computer Engineering students.
- Practical class instructor for a student group teaching Object-Oriented Design and Programming (DPOO), using the Java programming language for second-semester Computer Engineering students.

PROJECTS

DevisiStore

Multi-user digital catalog platform

Node.js / Express / SQLite

github.com/AndyCG03/devisistore

- Built a multi-tenant platform where each business gets its own public storefront with products, images, pricing, and direct WhatsApp contact.
- Implemented session-based authentication (bcrypt, express-session), rate-limited login, and role-based access control for admins and business owners.
- Deployed to production on Hostinger with a live public demo.

AlToque

Currency exchange app for Cuba

Flutter / Dart

github.com/AndyCG03/al_toque_app

- Built a Flutter app consuming a REST API to display real-time USD/EUR/MLC exchange rates, with a multi-currency calculator and historical charts.
- Implemented a native Android home-screen widget (Kotlin, AppWidgetProvider) with independent refresh via MethodChannel.
- Used the BLoC pattern for state management and Hive for local caching and offline fallback.

IA Para Todos — CUJAE

Multiplayer educational platform for teaching AI

Node.js / Socket.io

Faculty of Informatics Engineering, CUJAE

- Designed and built a multiplayer educational platform with 6 interactive game modules (Trivia, Turing Challenge, Ethical Dilemmas, Real-or-AI, Prompt Completion, Debate with AI).
- Supports up to 30 simultaneous students per room.
- Integrated OpenRouter to power the LLM-based game modules.

EDUCATION

Technological University of Havana, José Antonio Echeverría, CUJAE

Bachelor of Software Engineering — Software Engineer

Havana, Cuba

Feb 2023 – Jul 2026

Graduated: July 2026

GPA: 4.50/5.0 · Thesis Defense: 5.0

Distinctions: Graduado Integral de Facultad (Outstanding All-Around Graduate), Premio al Mérito Científico (Scientific Merit Award), Vanguardia de Comunicación e Investigación (Vanguard in Communication and Research)

ADDITIONAL SKILLS

- Native Spanish speaker, English (A2 Certification - Basic).
- Over 2 years of experience in social media management (Instagram), communication channels (Telegram), and content creation.
- Participant in various Hackathons (UNESCO Youth Hackathon 2024 and 2025; AVANCODE 2025; GLOBAL GAME JAM 2025) and Programming Contests (ICPC Caribbean Finals on three occasions, with a best result of Rank 37 in the Caribbean).
- Strong research profile with notable results in Scientific Conferences, with a publication in the National Student Journal of Engineering and Architecture (RENIA) titled "Prototype of an Intelligent Cultivation House".
- Leadership and Communication skills demonstrated in roles such as Vice President, Recreation, and Communication in the Faculty Secretariat.
